PROFESSIONAL SUMMARY

Fullstack Developer (UTN graduate) focused on building digital products that solve real business problems. Strong at functional analysis: I translate operational needs into scalable technical solutions. I leverage **AI-augmented development** tools (Claude Code, Gemini CLI) to maximize productivity.

TECHNICAL SKILLS

- **Frontend:** Angular 18 (RxJS, Signals), React, Next.js, Astro, shadcn/ui, Tailwind CSS.
- **Backend:** Node.js (Express), C# (.NET / Entity Framework), Python, Prisma ORM.
- **AI & Data:** RAG implementation (Gemini 2.0 Flash), pgvector, HuggingFace Embeddings, Supabase.
- **DevOps:** GitHub Actions (CI/CD & Cron), Git, Vercel, Docker.
- **AI Workflow:** Claude Code, Gemini CLI, Cursor.

PROFESSIONAL EXPERIENCE

Frontend Developer | Lindigo (Azopardo Project)
June 2025 – March 2026

- Built and maintained a management platform for sports and social clubs using Angular 18.
- Developed payment modules and member portals with reusable, scalable component architecture.
- Collaborated in agile team with weekly delivery cycles.

Fullstack Developer | Independent & Freelance Projects
January 2024 – Present

- **ULTRA ERP:** End-to-end system built with Next.js, Supabase, and shadcn/ui. AI assistant with RAG (Gemini 2.0 Flash + pgvector) reduced stock queries from minutes to seconds, replacing a paid system at zero cost.
- **Beast Motors:** Digital catalog for a car dealership with Next.js and Supabase. SEO optimization via ISR and Schema.org on a mobile-first platform.
- **Flight Price Bot:** Python automation deployed with GitHub Actions (Cron) for airfare monitoring and Telegram alerts. $0 infrastructure cost.

Customer Service & Administrative Management | SupleYA
December 2023 – March 2025

- Managed sales operations and branch accounting. Identified stock inefficiencies that led to the functional analysis and development of the ULTRA ERP system.

FEATURED PROJECTS

Adoptly | Final Project — UTN FR Paraná

- Animal adoption platform deployed and actively used by 4 real NGOs in Paraná.
- Clean Architecture: React + REST API with Node.js/Express, Prisma, and Supabase. Swagger docs, JWT auth, and load testing with k6.

EDUCATION

- **Associate Degree in Programming** | UTN FR Paraná (Graduated).
- **Associate Degree in Foreign Trade** | UADER (95% completed).
